CAREER OBJECTIVE

Aspiring Software Engineer with strong foundations in Java, SQL, Object-Oriented Programming, DBMS, and Full-Stack Development. Experienced in developing responsive web applications, REST APIs, CRUD systems, and backend services using Java, Spring Boot, Flask, and MERN stack technologies. Seeking an opportunity to contribute to enterprise software development while enhancing problem-solving and software engineering skills.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Design (CSD)

Dayananda Sagar Academy of Technology and Management | Graduation: 2027 | **CGPA: 8.57**

PUC (PCMB), Karnataka State Board – 92% | 10th CBSE – 92%

TECHNICAL SUMMARY

Full-stack web developer with hands-on experience in MERN and Flask. Skilled in building responsive UI using HTML, CSS, React.js, Tailwind/Bootstrap basics, and backend development with Node.js, Flask, and REST APIs. Experienced in MySQL/MongoDB database design, Git version control, and performance optimization.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript

Web Technologies: HTML, CSS, React.js, Node.js, Express.js

Backend & Frameworks: Spring Boot (Basics), Spring MVC (Basics), Flask, REST APIs

Databases: MySQL, MongoDB, Supabase

Tools & Platforms: GitHub, Postman, VS Code

Concepts: Object-Oriented Programming, DBMS, Data Structures & Algorithms, JDBC, CRUD Operations, RESTful Web Services, MVC Architecture

PROJECTS

ResumePilot AI (Next.js + FastAPI + PostgreSQL + Redis + Docker)

- Built a full-stack AI-powered resume analyzer with JWT-authenticated REST APIs, Next.js frontend, and a FastAPI backend deployed via Docker for scalable hosting.
- Integrated OpenAI, Sentence Transformers, and spaCy for intelligent resume-to-JD matching; added Redis caching to reduce repeated AI API calls and improve response speed.

StorySpire (React Native + Gemini API + Supabase)

- Contributed to backend development by integrating the Gemini API for real-time AI story generation tailored to user inputs.
- Implemented Supabase for user authentication, profile data management, and cloud media storage, ensuring a smooth cross-platform mobile experience.

Library Management System (MERN Stack)

- Developed a full-stack library automation platform with book search, borrow tracking, overdue-fine calculation, and role-based secure login.
- Designed RESTful APIs for all CRUD operations and implemented MongoDB schemas for efficient book and user data management.

Plant Disease Detection Using Deep Learning (Python, CNN, MobileNetV2, Streamlit)

- Built a deep learning classifier for plant disease detection using MobileNetV2 with transfer learning and data augmentation techniques to boost model accuracy.
- Deployed an interactive Streamlit web app enabling real-time disease prediction from uploaded leaf images.
